

Marda Gold Project DFS

Detailed Feasibility Study for 480kt Gold Project

Project

Marda Gold Project DFS

Location

Southern Cross, Western Australia

Client

Southern Cross

Commencement Date

January 2012

Description

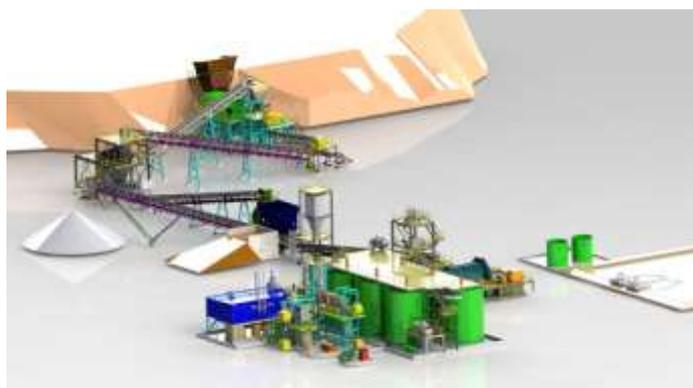

DFS undertaken for a 480ktpa Gold CIP Processing plant and associated infrastructure.

Processing plant designed to initially treat 480ktpa gold ore with the potential of upgrading to 1mtpa.

Plant includes: 2 stage crushing ball mill with gravity gold recovery circuit and intensive gravity leaching.

Carbon in pulp leach and adsorption circuit with elution circuit gold room.

Infrastructure includes workshop, office, stores, water dams and tailings dams.
