

# Kouroussa Gold Project

## 4T Pressure Zadra Installation

### Project

Kouroussa Gold Project

### Location

Guinea

### Client

Hummingbird Resources PLC

### Scope

4 Tonne Pressure Zadra Gold Elution Plant

### Description

Hummingbird Resources is currently building the Kouroussa Gold Mine located in the Siguiiri Basin, Guinea.

Kouroussa will be Hummingbird's second operation in Guinea (the other being Yanfolila) and its third in Africa with Dugbe in Liberia.

Como Engineers provided the loose equipment supply for a 4 Tonne Modular Pressure Zadra Gold Elution Plant, which was supplied to site for transport in sea containers. The regeneration kiln was supplied by Kemix and was transported directly from South Africa to Guinea.

Como Engineers were responsible for the final commissioning of the gold elution circuit.
