

Promontorio Copper Gold Project

PFS for Copper Gold Concentrator in Mexico

Project

Promontorio Copper Gold Project

Location

Senara – Mexico

Client

Azure Minerals

Commencement Date

April 2012

Practical Completion

On going

Description

Como Engineers were engaged by Azure Minerals to complete a Pre-Feasibility Study for the Promontorio Copper Gold Project in Senara, Mexico.

The Pre-Feasibility Study was undertaken to determine optimal flowsheet, capital, operating costs and concentrate transportation options for a copper and gold concentrator, treating underground ore from the Promontorio Mine.

Costs were determined to an accuracy of +/-25%

Project Manager

Alisdair Finnie
