

# Coyote Gold Plant

## Process Plant Refurbishment

### Project

Coyote Process Plant Refurbishment

### Location

Tanami, WA

### Client

ABM Resources NL

### Commencement Date

March 2015

### Practical Completion

May 2015

### Description

The Coyote Gold Plant contract involved the refurbishment of an existing 280ktpa gold processing plant.

Works included refurbishment of the crushing plant, grinding and gravity circuits, launders, chutes, walkways, platforms, stairs, hoppers, bins and other static equipment, including repairs to the leach and adsorption tank.

New auto-lubrication systems were designed, procured, installed and commissioned at the jaw crusher and the ball mill.

Electrical repairs and rectifications were carried out on the MCCs, Control Room, PLCs and transformer yard.
