

IMERYS Talc Plant

Talc Ore Sorting Plant Expansion

Project

IMERYS Talc Plant

Location

Three Springs, WA

Client

IMERYS Australia Talc Pty. Ltd

Commencement Date

July 2014

Practical Completion

December 2014

Description

Como Engineers were awarded the contract to complete the detailed engineering design, supply, construction and commissioning of the expansion of the Three Springs talc ore sorting treatment plant operated by IMERYS Australia Talc.

The plant comprises of single stage crushing (feed rate 250tph), conveyors, screens, chutes and bins (sourced from Indonesia and Australia), feeding free issued primary and secondary ore sorters.

Como Engineers were also responsible for all aspects of the works e.g. earthworks and concrete works, electrical and instrumentation, automation, structural and mechanical.

Yet another perfect example of Como Engineers success and EPC abilities within the industry.
