

# Mailuu-Suu (Krygzystan) Uranium

## Feasibility Study- Uranium tailings processing

### Project

Mailuu Suu tailings project

### Location

Kyrgyzstan

### Client

Nimrodel Resources Ltd

### Commencement Date

April 2008

### Practical Completion

April 2009

### Description

Como Engineers were engaged to make an initial assessment of the practicalities of the Mailuu Suu tailings project.

The radioactive tailings were required to be relocated, as they were on the banks of the Mailuu Suu river and were being washed downstream onto other towns and farmland.

The project will be financed by the World Bank.

Several site visits were undertaken and Como Engineers advised the proposed project to relocate the uranium tailings appeared to be feasible.
