

Mulga Rocks

Uranium Scoping Study

Project

Mulga Rocks Uranium

Location

Goldfields, WA

Client

Energy & Minerals Australia

Commencement Date

June 2009

Description

Como Engineers were requested by EMA Resources to conduct a Scoping Study on the Mulga Rocks Uranium Project.

Como Engineers Pty Ltd provided preliminary design and capital costs for the Mulga Rocks Uranium In situ Leach and Resin in pulp plants. Works included the preliminary design and costing of both ISL and RIP plants options which encompassed well fields, resin loading and precipitation, yellowcake drying and packaging and all associated infrastructure. The scoping study also generated operating costs.
