

Jaguar Copper / Zinc Plant

HMS Plant

Project

Jaguar Copper / Zinc Plant

Location

North Eastern Goldfields, WA

Client

Jabiru Metals / Independence Group

Scope

Scoping Study, Detailed Feasibility, Design, Construct and Commission

Description

Como Engineers were awarded the contract to complete the detailed engineering design, supply and construction of the HMS plant at Jabiru Metals, Jaguar Mine north of Kalgoorlie.

The plant has two main sections; two stage crushing, conveyors, screens and bins (sourced from China), feeding a modular 50tph HMS plant built in South Africa. The total project value is approximately \$10M.

Como Engineers also successfully completed the Scoping Study and Detailed Feasibility Study for the HMS Plant in 2011 with commissioning completed in May 2012.

A perfect example of how Como Engineers prides itself on being a company that can deliver from "Concept to Completion".
